

POS. 184: M-SECTION

fire design EC 3-1-2 (12.10), NA: Deutschland

1. input report

steel

steel grade S235

material safety factor

resistance of cross-sections $\gamma_{M0} = 1.00$

resistance of components in the event of fire $\gamma_{M,fi} = 1.00$

geometry

section RR 150 x 100 x 10.0(w)

cross-section temperature

thermal action due to the standard curve, fire resistance time $t = 30 \text{ min}$

all sides flamed

thermal insulation protection by plaster cladding s. EC 3-1-2, appendix AA:

thermal conductivity $\lambda_p = 0.12 \text{ W/(m}\cdot\text{K)}$, specific heat capacity $c_p = 1100 \text{ J/(kg}\cdot\text{K)}$, maximum density $\rho_p = 550 \text{ kg/m}^3$
thickness of insulating material $d_p = 5.0 \text{ mm}$

resistance

plastic verification incl. c/t-verification

fire design at temperature level

adjustment factors for uneven temperature distribution

across the cross section $\kappa_1 = 1.00$, along the beam $\kappa_2 = 1.00$

internal forces and moments (event of fire)

σ -generating forces (N, M) work at centroid, τ -generating forces (V, T_t) work at shear center

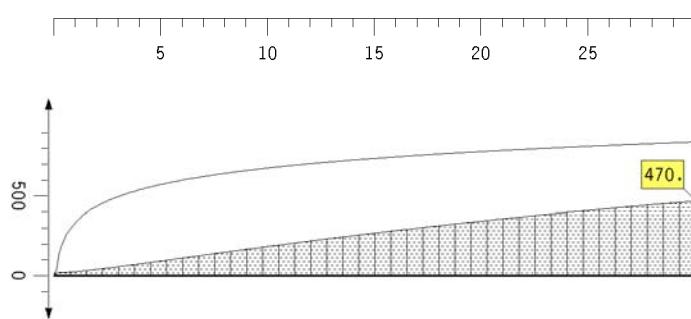

Lk 1: $M_{y,fi} = 40.00 \text{ kNm}$

notes

stability is not investigated.

2. cross-section temperature

section factor of the protected component $A_p/V = 474.2 / 4492.7 \cdot 10^3 = 105.6 \text{ 1/m}$
temperature development:

temperature in °C

fire time in min

max $T_a = 469.6^\circ\text{C}$

max $t = 30 \text{ min}$

cross-section temperature acc. to $t = 30 \text{ min}$: $T_a = 469.6^\circ\text{C}$

3. Lk 1

3.1. fire design

3.1.1. plastic verification

3.1.1.1. verification at temperature level

Utilisation rate at time t = 0 (normal temperature): $U_{\sigma} = 0.788 < 1$ **ok**

critical temperature $T_{a,cr} = 499.8 \text{ }^{\circ}\text{C}$

verification: $U_T = T_a/T_{a,cr} = 0.940 < 1$ **ok**

c/t-verification: utilization $U_{c/t} = 0.186 < 1$ **ok**

4. final result

maximum utilization:	temperature	max $U_T = 0.940 < 1$ ok
	stress	max $U_{\sigma,t=0} = 0.788 < 1$ ok
	c/t-ratio	max $U_{c/t} = 0.186 < 1$ ok
	resistance	max $U = 0.940 < 1$ ok

verification succeeded

5. Regulations

DIN EN 1990, Eurocode 0: Grundlagen der Tragwerksplanung;
